

Sompo International is the trade name for the global specialty property and casualty insurance and reinsurance operations of Sompo Holdings, Inc. ("Sompo"), established in March 2017 as the result of Sompo's acquisition of Endurance Specialty Holdings Ltd.

Sompo is a financial services holding company organized under the laws of Japan whose shares are listed and posted for trading on the Tokyo Stock Exchange. Sompo, through various operating subsidiaries, is one of the top three insurers in Japan and is engaged in the provision of insurance services as well as other related services through its global network of businesses operating in 32 countries around the world.

Sompo International is the international operation of Sompo and, through its operating subsidiaries, writes agriculture, casualty and other specialty, professional lines, property, marine/energy and aviation lines of insurance and catastrophe, property, casualty, professional lines and specialty lines of reinsurance.

As a leading global provider of insurance and reinsurance, we recognize that our success is derived directly from those whose contributions matter most: our people. Sompo International's headquarters is in Bermuda and we currently have offices in the United States, the United Kingdom, Continental Europe, and Asia. A shared commitment to integrity, accountability, collaboration and agility define our culture, and we strive to create exceptional value for our clients and shareholders and maintain Sompo International as a desirable place to work.

We are seeking a **VP of Data Management & Business Intelligence** to join our **IT** team in our **Purchase, NY** office. This is an exciting opportunity to improve and build analytics on very large data sets for a successful global company with numerous products, stakeholders, analytical needs and an intelligent workforce that demands information quality and versatility.

The VP of Data and Business Intelligence is the technical owner for key enterprise-wide data and business intelligence with a particular focus on internal reporting and analysis solutions as well the development and maintenance of transaction database solutions, operational data stores and the enterprise data warehouse.

He or she will be expected to work effectively at the highest levels of the organization and directly with the business teams to provide vision and define, develop, and implement data, analytics and BI solutions. It is expected to work closely with the business and technical teams in analysis on unique business problems and use creative-problem solving to deliver actionable output. This work will have a direct impact on the day-to-day decision making.

The role is expected to perform at the strategic and operational level alike. He or she must contribute in aligning data and BI activities to the overall IT strategy and its alignment to our broader corporate strategy.

Main areas of responsibility:

- This role is accountable for leading, managing, mentoring, and developing the teams responsible for creating an information advantage for the organization with a focus on

SOMPO INTERNATIONAL
