

# Endurance Global Risk Solutions Claims Adjusting Unit FINANCIAL INSTITUTIONS

*The Endurance Global Risk Solutions Financial Institutions claims management approach is of the highest caliber, exemplified by expertise, efficiency, and innovation.*

The Endurance Global Risk Solutions Financial Institutions claims management approach is of the highest caliber, exemplified by expertise, efficiency, and innovation. Unlike other claims departments, we have a dedicated Property & Casualty Adjusting Unit that is well positioned to proactively address claims that arise from your organization's real and personal property as well as your operations.

At Endurance Global Risk Solutions (GRS) we do not just look at individual claims; we look at our client's entire insurance program. This approach ensures responsive claims management, valuable risk management insights and real time risk analytics to assist our clients in portfolio management.

Our GRS Claims Adjusting professionals average over 20 years of industry experience. All claims are overseen by an Endurance GRS Subject Matter Expert who jointly reports to the Global Head of Insurance Claims and the Chief Executive Officer of GRS.

We utilize a state-of-the-art web-based claims management system to provide performance metrics and a tailored suite of analytical reports to ensure effective claims management. Some features and benefits include:

- Customizable dashboards with over 60 report widgets providing key insights into your program's performance
- Over 100 report templates and a robust ad hoc report builder to create custom reports and graphs
- An integrated claim data and notes view
- Drill down capabilities to access detailed claim-level information
- Pyramid location hierarchy capability

Each account is assigned a GRS Claims Account Manager (CAM). The CAM is a senior-level Endurance claims professional with significant authority who collaborates with the client, underwriter, broker, loss control and claims teams. As the liaison, the CAM's role is to identify and evaluate trends, interface with the business partners on claim triggers and, in conjunction with the Endurance GRS Subject Matter Expert, deliver proactive solutions. The CAM conducts coverage letter reviews, coordinates mediations, provides settlement authorizations, and leads claim reviews.

*We utilize a state-of-the-art web-based claims management system to provide performance metrics and a tailored suite of analytical reports to ensure effective claims management.*

# FINANCIAL INSTITUTIONS
