

### **Risk Control – Renewable Energy Specialist**

Sompo International Holdings Ltd. (Sompo International) is a global specialty provider of property and casualty insurance and reinsurance. Sompo International companies are wholly owned subsidiaries of Sompo Holdings, Inc., whose core business encompasses one of the largest property and casualty insurance groups in the Japanese domestic market.

Through our operating subsidiaries, Sompo International underwrites agriculture, professional lines, property, aviation, marine and energy, financial and political risks and casualty and other specialty and catastrophe lines of insurance and reinsurance. Headquartered in Bermuda, we currently also have offices in the United States, the United Kingdom, Continental Europe, Latin America, the Middle East and Asia.

Sompo International is a company driven by its core values, a carrier that holds promise, trust and the commitment to protect at the center of everything we do. We recognize that our success is derived directly from those who matter most: our people. Our culture is defined by a commitment to integrity, teamwork, agility, execution, and excellence; and we strive to create exceptional value for our clients and shareholders and maintain Sompo International as a desirable place to work.

We are seeking a **Renewable Energy Specialist** for our UK Risk Control Department supporting our Energy line of business. The role will be located in the U.K with hybrid working, reporting into Sompo International Head Office, London.

Sompo International's energy team offers an integrated approach to underwriting exposures across all aspects of the energy chain. With years of experience, our dedicated team is an approachable and trusted partner in providing solutions to intermediaries and clients.

The Renewable Energy Specialist will be responsible for the provision of risk assessments and consultative services for all types of renewable energy clients. They will support client retention and new business development, as well as promoting Sompo International's expertise and brand within the marketplace by attending and participating in conferences and recognized industry organizations. This person will be responsible for supporting and achieving renewable risk control objectives in line with Sompo International's overarching strategy.

In addition, the Risk Control – Renewable Energy Specialist will provide risk improvement consultation to our renewable energy customers, initiate and/or support innovative products and services and provide added value to our clients. Candidate must have proficiency in risk control skills in the onshore and offshore existing and emerging renewable energy sector.

#### **Responsibilities Include:**

- Supporting Sompo International Global Markets, UK Energy Line of Business, Claims and Management/Executive teams to support and strengthen corporate business goals, including client retention, new business growth, overall profitability while reducing loss exposure for the region for renewable energy and the wider energy sectors when required.

## SOMPO INTERNATIONAL

- Undertaking Global Risk Control Surveys (site, desktop, hybrid & virtual) for onshore and supporting offshore renewable energy clients including Wind, Solar Technology, BESS, CCUS etc. to determine potential hazards and risk factors to be considered in underwriting / risk selection.
- Ensuring Risk Control surveys and service activities are completed on time, are appropriate for the identified hazard/exposures and accurate to support clients.
- Contribute to and monitor recommendations made by lead carrier consultants on written programmes and ensuring critical recommendations are addressed by clients while providing continued support to enable their success.
- Providing service quality reviews, market presentation and risk desk reviews for Underwriters.
- Ensuring timely delivery of risk control works for account renewal activities to enable underwriting to achieve department objectives.
- Create client facing reports and loss control surveys while developing and implementing Sompo International's market leading insightful content.
- Analyzing loss trends, recognizing opportunities to provide risk control products and / or services which can help reduce losses.
- Identifying areas of development for the risk team and providing coaching and / or training for the strengthening of technical, business and professional acumen.
- Support and drive the creation of a renewables industry sector Risk Control proposition.
- Support innovation in the renewables sector for client products and services in partnership with Sompo International's Risk Control Service Transformation department
- Supporting and promoting corporate, departmental and team goals, programs and directives.
- Supporting work on corporate projects, white papers or marketing materials.
- Supporting and participating in marketing events and industry specific events promoting Sompo International's expertise and brand.
- Supporting activities with corporate business partners including Claims, Underwriting, Marketing etc. to enhance Sompo International brand with the marketplace.
- Assisting leadership with budget development and strategic planning.
- Maintaining a high level of insurance and risk-based engineering industry awareness and expertise in applicable subject matters.
- Attending Client / Broker meetings, lunches, dinners and other social outings as applicable.
- Expanding existing relationships and seeking new prospective Energy clients.

### **Desired Skills and Experience:**

- A University degree or equivalent industry accreditation.
- 5+ years' experience in industry with demonstrated experience in risk control applicable to renewable energy.
- Experience in the London Market insurance region with demonstrated experience in risk control applicable to renewable energy is a plus.
- Solid understanding of sound risk control processes and techniques.
- Proven experience with renewable industrial technology including: - Wind, solar (including CSP), BESS and CCUS.
- Knowledge of asset and integrated monitoring and data acquisition systems as well as IoT for wind/solar.
- Industrial construction project experience particularly in renewables will be valued.

## SOMPO INTERNATIONAL

- Sound understanding of power generation and electrical infrastructure and associated risks.
- Ability to effectively identify and problem solve and find alternative equivalent solutions to complex technical business problems.
- Excellent oral and written skills combined with strong interpersonal and leadership skills.
- Ability to manage internal and external conflict in a professional manner, maintaining department, team and business reputation at all times. Ability to seek solution, communicate and work towards resolution.
- Proven and demonstrable track record of superior analytical, project management and planning skills.
- Experienced self-starter who can initiate, organize and manage effective work scope in a timely manner with minimal supervision.
